Office Action Summary

Art Unit: 1762

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. laser crystallization of semiconductor films (claims 11-16, 112, 125, 136);
- b. laser treatment of any film over an ion blocking film (claims 17-60, 97-100, 129-130)
 - (i) silicon oxide
 - (ii) silicon nitride
 - (iii) transparent conductive oxide
- c. laser treatment of a semiconductor film over an ion blocking film with ion blocker film (claims 61-96, 101-109, 123, 131);
 - (i) silicon oxide
 - (ii) silicon nitride
- d. laser treatment of a semiconductor film (claims 113-122, 124, 126-128, and 137-139).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4, 6-9, 110-111 and 132-135 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 1762

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication should be directed to M L. Padgett at telephone number 703-308-2336 on M-F from about 8:30 am to 4:30 pm; FAX # (703) 872-9310 (official) or 305-6078 (unofficial).
